

UML Component Diagram — Campus Placement & Internship Pipeline (Microservices Architecture)

AADITYA SHANKAR CHANDAN | PES1UG24CS003

○ Provided interface (ball)

⊖ Required interface (socket)

- - - - -> «use» dependency

□ «component» stereotype (icon in top-right corner)

Architecture: Microservices — each service is independently deployable, scales separately, and owns its slice of data through the shared Database component.
